Web development project created for the pastry business Chokolade La Plata.

### Simple Calculator (Javascript / React)

Development of a simple calculator carried out using HTML, CSS, and JavaScript. The same calculator was implemented using React, Node and express.

### My To-Do App

Development of a task management application.

## About me

I am a Junior Full Stack Developer and UX/UI Designer. My professional career began in the field of engineering; however, I am now facing a new challenge: developing my career in Full Stack development and UX/UI design. For several years, I have been training in various technologies and frameworks for building web applications, as well as in UX/UI design principles. I am currently seeking opportunities that will allow me to grow both personally and professionally combining my Full Stack programming skills with the creation of optimized and intuitive user experiences.

I am a fast learner, enjoy working in a team, and above all, I strive to create a work environment where everyone can support each other.

## Professional Experience

### Freelance web development

Barcelona, Spain | July 2024 – Present

#### Personal project: Training Application

- Implemented a mobile training application using React Native.
- Designed and developed features such as routine management, muscle group organization, and exercise tracking.
- Integrated a MongoDB database for data storage and retrieval.
- Created a responsive and optimized user interface.

Barcelona, Spain | July 2024 – Present

#### Project: Chokolade La Plata

- Designed and developed a fully functional and responsive website for the Chokolade La Plata bakery business.
- Built using HTML, CSS, JavaScript, and Bootstrap framework.
- Despite not being published due to client decisions, the site was optimized for various devices and screen sizes.

### Saybolt: Chief Analyst

Barcelona, Spain | November 2022 – June 2023

Personnel in charge: 8

- Led a team of 8 analysts, ensuring the delivery of high-quality laboratory results.
- Managed workflows, prioritized tasks, and optimized team performance.
- Interfaced with clients to confirm test requirements and provide timely updates.
- Implemented system improvements, enhancing operational efficiency.
